DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-7, 31-49, and 51 of U.S. Patent No. 5,908,283 in view of U.S. Patent No. 6,669,007. U.S. Patent teaches all of the limitation of the claimed subject matter of the instant application except that the length dimension determination is made in the order that the packages were received. U.S. Patent No. 6,669,007 teaches this feature, it would have been obvious to one of ordinary skill in the art to determine the length dimension of the packages in the order the packages were received in order to efficiently move the packages into the accumulator. This obvious combination anticipates the claims of the instant application, and therefore the claims are rejected under obviousness-type double patenting.

Response to Arguments

Applicant's arguments, see pages 14-16 of Remarks, filed 31 March 2006, with respect to the rejection of claims 1-18 under 35 U.S.C. 102 have been fully considered and are persuasive. The rejection of claims 1-18 has been withdrawn.
